3. BACKGROUND AND LEGISLATION

Background

The *Early Years Learning Framework* (EYLF) and the *Victorian Early Years Learning and Development Framework* (VEYLDF) include a focus on social, emotional, spiritual and physical wellbeing and health. Development Outcome 3 in both framework documents refers to a child’s ability to take increasing responsibility for their own wellbeing. One of the indicators for this capacity is that

children “recognise and communicate their bodily needs (for example thirst, hunger, rest, comfort, physical activity)”. The EYLF suggests that to promote this, educators should:

- consider the pace of the day within the context of the community
- provide a range of active and restful experiences throughout the day, and support children to make appropriate decisions regarding participation.

Employers have a responsibility under the *Occupational Health and Safety Act* to provide a safe and healthy working environment. This duty extends to others present in the workplace, including children and volunteers. Providing a safe environment for children at the service includes complying with current Australian/New Zealand standards in relation to equipment, such as cots and mattresses (refer to *Sources*).

Legislation and standards

Relevant legislation and standards include but are not limited to:

- *Australian Consumer Law and Fair Trading Act 2012*
- *Australian Consumer Law and Fair Trading Regulations 2012*
- *Education and Care Services National Law Act 2010*
- *Education and Care Services National Regulations 2011*
- *National Quality Standard, Quality Area 2: Children’s Health and Safety*
- *Occupational Health and Safety Act 2004*

4. DEFINITIONS

The terms defined in this section relate specifically to this policy. For commonly used terms e.g. Approved Provider, Nominated Supervisor, Regulatory Authority etc. refer to the *General Definitions* section of this PolicyWorks manual provided in each Foyer.

Adequate supervision: Adequate supervision refers to constant, active and diligent supervision of every child at the service. Adequate supervision requires that educators are always in a position to observe each child, respond to individual needs, and immediately intervene if necessary. Variables affecting supervision levels include:

- number, age and abilities of children
- number and positioning of educators
- current activity of each child
- areas in which the children are engaged in an activity (visibility and accessibility)
- developmental profile of each child and of the group of children
- experience, knowledge and skill of each educator
- need for educators to move between areas (effective communication strategies).

Duty of care: A common law concept that refers to the responsibilities of organisations to provide people with an adequate level of protection against harm and all reasonable foreseeable risk of injury.

Red Nose: (formerly SIDS and Kids), the recognised national authority on safe sleeping practices for infants and children (refer to *Sources*)

Relaxation/rest: A period of inactivity, solitude, calmness or tranquillity.

SIDS (Sudden Infant Death Syndrome): The unexpected and unexplained death of an infant, usually occurring during sleep.
